

FOR IMMEDIATE RELEASE

The Xtreme Value Tower Series (XVT) Officially Introduced

April 1, 2008 – The Value Leader in Power Protection, Xtreme Power Conversion, Inc. (Xtreme Power) announces a new family of line interactive, low cost, long runtime tower form-factor uninterruptible power supplies to its suite of power protection and data center products.

Some of the outstanding features of the XVT Series are:

- 1) Maximum reliability
- 2) Automatic Voltage Regulation (AVR)
- 3) Lower total cost of ownership
- 4) More battery capacity and longer runtimes than similarly priced competitive models
- 5) Unparalleled pricing
- 6) More VA for the money
- 7) USB Connectivity

The XVT Series is available in four optimized sizes: 600va, 800va, 1200va and 1500VA. The offering incorporates line interactive technology ensuring maximum reliability and efficiency. Line interactive technology widens the input voltage range so the batteries are used less frequently so battery life is enhanced. This decreases the need for battery replacements and dramatically lowers the Total Cost of Ownership. Features such as “plug and play” USB monitoring capability allows for simplistic server and computer monitoring and unattended shutdown of valuable applications and files.

“Listening to customer requirements and implementing their feedback was a cornerstone in the development of the XVT Series. Rather than purchasing an “off the shelf” product from China, as many of our competitors do, we have focused on providing a positive customer centric product with the XVT Series and all of our products. Thus, we believe that the XVT Series solves real world customer problems through a feature set and cost point very rarely achieved in today’s market. There is no question that “Xtreme Value” has been achieved with the XVT line of uninterruptible power supplies,” states Gene Adams, Xtreme Power’s President.

The XVT products are available through various distribution channels. Please contact MaxPower Corporation for reseller sales: www.maxpowercorp.com
